Friday 20th March 2020

Dear Parent/Carer,

RE: Homework during school closure

Homework

As you are aware, the school will be closed from Monday 23rd March until further notice. Despite the school's closure, we will still endeavour to support your child's learning and progress during this time. Your child has been given a pack of homework tasks to complete by their class teacher to help support them in their learning. Please encourage and support your child with completing these tasks. We suggest spending between 15 and 30 minutes on these homework tasks per day and recommend spreading the tasks out over the period for which the school is closed in order to keep your child engaged in their learning over the course of the period.

Other Ways to Support Your Child

It is imperative during this period of time that your child reads independently, is heard read or is read to every day. We recommend a minimum of 20 minutes per day for children in the Early Years and KS1 and a minimum of 30 minutes for children in KS2. Furthermore, please support your child in regularly practicing their times tables and mental maths skills at home.

Online Learning

Your child has been given an individual log in for the maths online program 'Mathletics': <https://login.mathletics.com>. Please encourage your child to utilise the online Mathletics programme at home using their personal log in to give them access to maths activities specifically set by their class teacher to support your child's learning in mathematics during this time. We recommend that your child uses Mathletics every day for a minimum of 10-20 minutes every day in order to continue to consolidate and develop their key mathematical skills.

Your child has also been given access to 'Lexia', a fun computer-based program that builds on our classroom learning and supports your child in developing their reading, spelling, vocabulary and comprehension skills.

Your child will work through a set of activities matched to their reading ability. These activities help them to practice their skills, while also tracking their progress and providing feedback to teachers.

We would like your child to begin using Lexia at home during this period of closure to support their progress in this important area of their learning. We recommend using the program for short, regular periods (e.g. 15 mins daily rather than an hour once a week) for maximum benefit.

Please follow the instructions below to get started:

1. To use on a computer, go to www.lexiacore5.com
2. To use on an iPad, iPad mini, or Android* tablet, download the free Lexia Core5 Reading app from the App Store or the Google Play store. *Android support is limited to these devices: Samsung Galaxy Tab S2, Google Pixel C, and Google Nexus 7" (2012 and 2013) and 10". The app will not work on other devices, including Kindle.
3. The first time your child uses Lexia Core5, you may need to enter the teacher email shown below. Your child can then log in with the username and password used at school and listed below.

Teacher Email (for setup only): lexia@gmail.com

Username: _____

Password: read

4. It is important that your child works without any help while using Lexia.

All of the work your child does at home is recorded by the program and reported to school.

We hope that your child enjoys using Lexia and thank you for supporting them with their reading development.

Please see the 'Home Learning' section of our website: <http://stjosephsgeorgerow.org/home-learning/> for further suggestions for websites that could be used to support your child's learning during this time. We will also make the resources, readings and reflections, for our whole school Lenten Project 'Follow the Word' available on the 'Catholic Identity' Page of our website: <http://stjosephsgeorgerow.org/catholic-identity> so that the pupils can continue working upon their Lenten Project at home.

Additional Homework

If the school remains closed for a prolonged period of time, we will send additional homework for your child to complete via post.

Yours faithfully,

Mrs Byrne

(Headteacher)

Keeping healthy:

Ideas for keeping your family healthy and well during the coronavirus outbreak.

Healthy Schools Partnership
London Borough of Southwark

Staying healthy at home

Many parents and carers will now need to work from home while also caring for their children to help control the spread of coronavirus. Below are some useful suggestions for staying emotionally, physically and mentally healthy during this time. We hope this information provides you with some helpful ideas that you can adopt.

How to look after your family's health and emotional wellbeing during this time:

Eat right

Eating healthy meals will strengthen your immune system and boost your mood. Prepare meals that include: a variety of vegetables (fresh, canned or frozen); starchy foods such as potatoes, rice or pasta; and protein such as beans, fish, eggs or meat. Stay hydrated by drinking 6 to 8 glasses of water daily. Between meals, eat healthy snacks such as yoghurt, fruit slices, chopped vegetables with hummus, plain crackers, plain popcorn and rice cakes. Limit sugary snacks which can cause tooth decay, poor concentration and weight gain.

Top tips:

Get your children involved in planning and preparing meals. For recipe ideas that are quick, easy and healthy, visit the **Change4life** website. Encourage your family to start their day well with a breakfast of porridge, Shredded Wheat or Weetabix with fruit slices, milk and yoghurt.

Keep physically active

Physical activity, such as going for a walk or bike ride outside, will boost your immune system, improve your mood and reduce anxiety levels. Children and young people need at be physically active for at least 60 minutes every day and this can be spread throughout the day. If you are required to self-isolate, keep physically active at home with your family by dancing to music, doing yoga and following along with online exercise workouts. Housework and gardening is also a good way to stay active.

Top tips:

YouTube Kids and has a range of fun dance routines for kids including Zumba workouts. Kids can also keep active with **Disney's 10 minute shake-up games**, and **Disney Dance-Alongs**. Adults can try 500 free workout videos from **Fitness Blender** and **Les Mills**.

Create a routine

Map out a schedule with your child that includes time for learning, homework, meals, exercise, relaxation and bedtime. Use apps such as **Habitica** to schedule your activities. Start your day with a healthy breakfast and some physical activity (see activity ideas), followed by lessons with regular active breaks. If you are working from home, try working some time periods in a separate space to minimise distractions. After lessons, schedule in creative activities such as arts and crafts, reading or playing musical instruments. Limit your child's screen time and make sure your child gets to bed at their normal bedtime.

Top tips:

Your school will provide you with resources and ideas so your child can continue their learning from home. For additional ideas, kids can play fun, educational games on the **BBC Bitesize** website and watch curriculum videos on **BBC Teach**. **Timetable Rockstars** are currently offering free full access and ask your school for more ideas. After lessons, keep kids busy with arts and crafts (see **YouTube Kids** for craft ideas), boardgames, audiobooks, podcasts, books or ebooks from your library, or with a language app such as **Duolingo**.

Look after your mental health

If the news is making you anxious, limit the amount you watch and read to once a day and only read good quality information and advice on the virus at **GOV.UK**, **WHO** and the **NHS coronavirus** website. Stay socially connected with friends and family regularly on either social media, email, phone or video chat. This will be especially important if you need to self-isolate. Exercising and eating well will help manage stress and anxiety, and you can also try breathing exercises, yoga, meditation or mindfulness to help you stay calm and to relieve stress.

Top tips:

The **NHS Livewell** webpage has ideas for looking after your mental wellbeing, breathing exercises you can try to lower anxiety, and information on mindfulness. Use the **Pacifica** app to reduce your stress and anxiety, and for guided meditation, download the **Headspace** app. For more information on looking after your mental health, visit the **Mind** website, and if you are feeling emotional distress or are struggling to cope, call your local **Samaritans** for emotional support (children can call **Childline**).

Talk to your child

Your children will be hearing about coronavirus and may be feeling anxious. It is important that you make them feel safe, but be truthful and speak calmly and reassuringly. Give them space to share their fears and help them feel in control by giving them specific things they can do such as getting lots of sleep and washing their hands. Talk about what is happening to keep people healthy and regularly check in with your child and answer their questions.
